- Input Monitor Function
- 25 Track Program Play Memory
- Sync Record Function
- Auto ID Function w/ Adjustable Sensitivity
- Digital Gain Adjustment
- User Selectable Digital Fades
- Overrides SCMS Codes
- Headphone Output w/ Level Control

TASCAM's CD-RW700 is a professional audio CD recorder, providing an advanced feature set at a modest price. This robust CD-Recorder's price-point actually makes it affordable enough to be installed in place of a CD player, in many occasions.

Many of our CD-RW700 owners have commented on the fantastic sound of the recordings they've made. Our 24-bit A/D and D/A converters capture and reproduce the audio with the maximum resolution. For true audiophiles, a "Digital Direct" mode is offered, which bypasses sample rate conversion to give you an exact copy of the original audio.

The CD-RW700 is easy to use. Unlike consumer CD-Recorders which require "For Audio Only" CDs, the CD-RW700 is able to record to standard data CD blanks used for computers. The CD-RW700 can also override SCMS codes implemented with consumer players. This means that you won't get stuck with the wrong media, and you'll always be able to make distribution copies of your work.

The CD-RW700's durability comes from the TEAC CD-RW mechanism. Rather than utilizing a modified consumer CD player mechanism, the CD-RW700 uses a TEAC CD-RW computer mechanism. These drives are extremely robust, carrying a mean time between failure rating of 100,000 power-on hours.

The RC-RW700 wireless remote is included with the CD-RW700.
